

FRA Alumni Spotlight:

Steve Boudreaux

What year did you graduate?

1974

How did FRA prepare you for college and life?

Had great teachers, particularly my math teacher – Mr. Riley Ewing. He provided me with the knowledge and confidence to pursue a degree in engineering. Overall – from the principal to teachers – there was an atmosphere of encouragement and an expectation of achievement.

What do you love about FRA?

FRA is a valued member of the community. It provides an essential service to the families of Pointe Coupee and the surrounding area.

What would you tell a student or family who is considering an education at FRA?

For parents, FRA is a safe place for your child. For students, it's a place where you'll be respected, challenged and prepared for the future.

What is your favorite memory of FRA?

Watching my mother and father, and many other members of the Pointe Coupee Parish community come together and “literally build a school”.

Is there anything else you would like to share with us?

An institution like FRA only flourishes when each family and each generation have a desire to give more in time and finances than they receive in benefits.

“The price of greatness is responsibility.” — Winston Churchill
